Profile

Front-end web developer with an Engineering degree from Zagazig University. Skilled in crafting responsive, user-friendly websites using Tailwind CSS, React, and JavaScript. Adept at delivering seamless user experiences and solving complex problems with effective code solutions.

Education

Faculty of Engineering, Zagazig University 2019 - 2024
Bachelor of Science in Computer Science

- **Grade:** Very Good

Experience

ITI React.js Summer Training Sep 2023

- Built responsive web applications using React.js, Bootstrap, and ES6 JavaScript, focusing on clean, modular code.

Projects

Website Builder (Graduation Project) [🔗](#)

- Developed a website builder with React.js, Tailwind CSS, Redux Toolkit, integrating backend authentication and services, and implemented i18next for Arabic and English support.

Restaurant Market [🔗](#)

- Created an e-commerce platform with React.js and Tailwind CSS, featuring restaurant and market functionalities, product listings, interactive sliders, and managed cart state with Redux Toolkit.

Portfolio Website [🔗](#)

- Designed a personal portfolio with React.js and Tailwind CSS, featuring Formspreet for contact forms, Framer Motion for animations, and i18next for multi-language support.

Quran App [🔗](#)

- Developed a React.js app with Tailwind CSS and Redux Toolkit to display Quranic verses with audio playback and navigation between surahs.

Game Hub Website [🔗](#)

- Built a game discovery hub with JavaScript and CSS, featuring a user-friendly interface for exploring and engaging with games.
